

MASTERCLASS ASSESSMENT

Information

<i>Target group:</i>	professional trainers
<i>Entry level:</i>	Advanced
<i>Entry level description:</i>	Training of Trainer course provided by <i>World Water Academy</i>
<i>Duration:</i>	1 day

Learning targets

In the didactical model, the assessment is the evaluation part of the course. After formulating the learning objectives and developing the course material, the results of the assessment shows if the objectives has been reached. The assessment is one to one related with the learning objectives of the course. It is also the starting point of adapting the developed material in order to increase the course.

The assessment is for both the trainer and participant crucial to know if the respectively gave and got the training adequately.

The MasterClass focuses on assessment procedures and various types of questioning, like multi-choice questions, open questions and case questions. With practical exercises and group discussion the participant trains how to make assessment for a training. After the course a professional trainer is able to decide which kind of assessment is necessary and to make the questions and formulate the answers.
