PROJECTS

THE NETHERLANDS

We were established in 1994 by the Dutch water sector to improve the quality of its employees with specific, practical knowledge on water issues. Each year we train up to 3000 water professionals on various water topics like water supply, wastewater treatment, water management, flood control, climate change, urban water and sanitation.

SOUTHERN AFRICA

Bridging the Water

City of Cape Town, Durban and more (South Africa), 2019 – 2022

In 2019 the Orange Knowledge Programme 'Bridging the Water' took off. The project, funded by Nuffic, is a collaboration between Dutch and South African partners to improve the skills and knowledge of water professionals in South Africa and to develop sustainable knowledge-exchange and collaboration.

Course Weather Smart

Nelspruit (South Africa), 2018

Inkomati - Usuthu Catchment Management Agency (IUCMA) is responsible for water management in South Africa across the basin of the Komati and Usuthu rivers. IUCMA and other CMA's in South Africa invested in dashboards to streamline the weather and water management data more efficiently. The purpose of this modular course of nine days was to train employees of the IUCMA in water resource management combined with weather forecast and the use of the dashboards.

Centre of Expertise

2012 - 2017 Durban (South Africa)

The Centre of Expertise is an initiative by eThekweni Water & Sanitation (EWS) in Durban and various Dutch partners. Under the general framework a series of pilot projects will be executed to showcase the implementation of new technologies and knowledge at EWS. For these individual pilot projects contribution and support from various partners will be combined.

ABOUT US

World Water Academy is the leading training institute for water professionals in The Netherlands and abroad. Worldwide we encourage water professionals to gain and share water knowledge and skills. We offer interactive and practical training courses and tailored training programmes which are well-known for their quality (ISO9001 certified). Our trainers are senior experts on water topics with up-to-date water knowledge and didactical skills. World Water Academy trains water professionals with up-to-date materials and inspiring, tailored and interactive training programmes.

"I learned how to teach and determine the teaching objects and how to make a script and presentation. I never considered myself as a trainer, but now I think I will succeed!"

Participant of the Train the Trainer course in Indonesia

"Everyone working in wastewater should get the opportunity to attend this course because it is mind opening and explains better the wastewater treatment process"

Participant of the Processes of wastewater treatment course in South Africa

"It was an excellent training with explanation of treatment stages and discussion about innovations for Jordan, the field visit enriched the learning outcomes."

Participant of the Drinking Water Treatment Techniques course in Jordan
